

Fix My Energy

Green energy fixed for life

Secure your energy against future price increases

Fixing your energy is a smart way to get solar. Pay nothing upfront for the equipment, installation or maintenance and instead pay a low cost fixed price for any solar electricity you use. It's cheaper than buying electricity from the grid and greener too.

"I would absolutely recommend it to my friends and family. Who doesn't want to save money?"

Emma, South Devon

Benefits

Fix My Energy

Pay nothing for the Sunplug system

Cut my energy bills

Everything is fully maintained

Add value to my property

Discover ways to reduce my bills further

Lower my CO2 emissions and live more sustainably

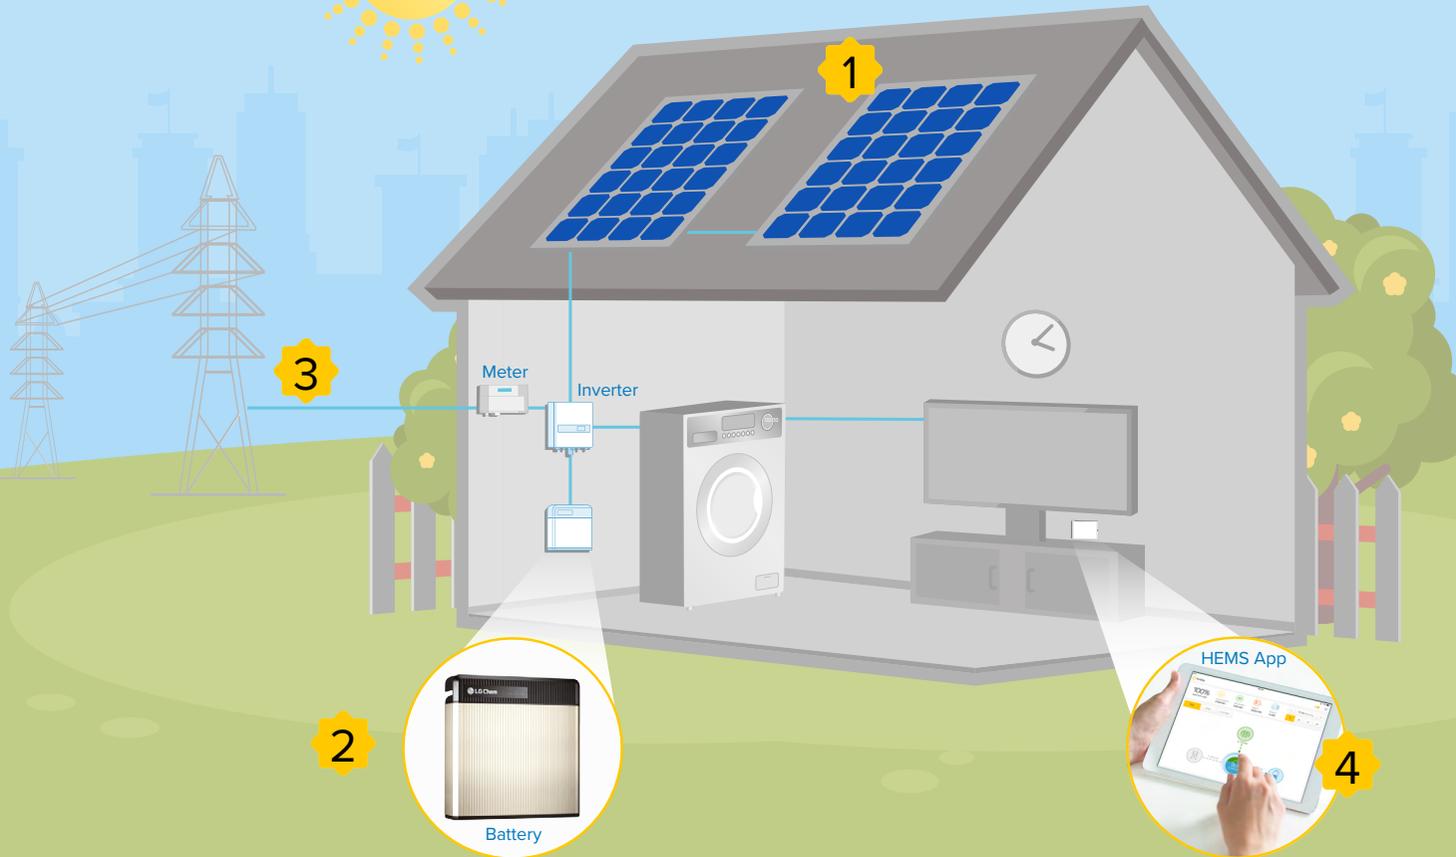

Buy less electricity from the grid

LG Chem provides the most optimal solution using state-of-the-art energy storage system with a long lifespan and high quality.

How it works

Your solar energy price will be fixed until 2037 at a lower price than today's electricity. That means you immediately save on energy you currently buy from the grid, and if the price goes up you'll save even more.

Typically 70% of your electricity will come from your solar system over the first year, which means you can save over £200 in year one*.

The remaining 30% of your electricity will come from your current supplier like it normally does. You have the flexibility to change your supplier at any time.

- 1 Solar panels turn energy from the sun into electricity for your home.
- 2 Your home uses the solar energy or stores it in your battery for later. Energy stored in your battery can be used later on, even when it's dark.
- 3 Any excess energy generated is sent to the grid or any you need for your home is taken from it.
- 4 You can use the HEMS app to see how you're using energy to see where you could save.

Will my home be suitable?

To get Sunplug, you must:

- Own your home
- Face south, south-east or south-west.

How will I be billed?

You'll receive a bill from Sunplug each month and a direct debit will automatically take the money from your bank account.

You'll continue to receive bills from your grid supplier as you normally do.

Can I sell my home?

Yes, absolutely. We can arrange to transfer your contract over to the new owner subject to their consent or remove the system from the property.
